

Eurotechnologies Ltd Compliance with RoHS

RoHS (Restriction of Hazardous Substances) is a European Union directive that restricts the use of lead, mercury, cadmium, chromium (VI), PBBs, and PBDEs in electrical and electronic equipment as of July 1, 2006.

Statement of RoHS Designation for Biovest products

Biovest designates its Cell Culture instruments as "Category 9: Industrial Monitoring and Control Instruments" under RoHS Directive 2002/95/EC.

Under this designation, Biovest's products are exempt from RoHS compliance until July 22, 2017.

Justification of Designation

Biovest International, Inc. manufactures instruments that collect information on temperature, pH, CO₂ levels, etc. to monitor and control the growth of cells within commercial production facilities.

Future Obligations.

Cell Culture Company (Biovest) does not intend meeting pending European RoHS compliance standards for its instruments and spare parts and have no plans to pursue RoHS compliance in the foreseeable future. As such, Eurotechnologies has been forced to take the decision that, from 30th June 2017, it is unable to supply new C3 equipment.

C3 **intends** to meet RoHS compliance standards for its disposable cultureware products
